2. Slide the generator onto the axle.
3. Secure the headlight to the handlebar with the ratcheted strap design.

s p i n e t i c s

- We are a one-woman, one-man, Miami-based, grassroots, tech startup launching our first green-friendly bicycle generator accessory (the CydeKick) on Kickstarter this July.
- Our vision: To help facilitate a shift in culture toward a more progressive, environmentally-aware, and health-conscious society by developing products that make cycling a more convenient option for commuting and leisure.
- We are also supporters of cancer research; 3% of all profit to be donated University of South Florida Metabolic Therapy and Cancer Research (501c3 registered).
